

CSE 090 / CSE 290: Tales of Modern Software Engineering

How AI is (and isn't) changing how software engineers build the computer systems that power our world

“What do software engineers do when all the code is written by AI?”

“Where does AI fail in SWE?”

“Where do software engineers add value now?”

“So what skills do I need?”

10+ software engineers, 10+ companies, ten weeks: What do SWE jobs look like now — and what should you be learning to prepare for one?

Speakers from local tech companies, big tech, startups, independent developers, UCSD faculty and UCSD student interns

Mondays 11–12

Qualcomm Institute Auditorium,
Atkinson Hall (Near the Bear)

CSE-090-SE (ugrad)

TSS: SE00159590

CSE-290-SE (grad)

TSS: SE00155014

No Prerequisites · 1 Unit
